Professional Summary

Generative AI Engineer with 2+ years of experience building enterprise AI applications using LLMs, Agentic AI, RAG, multi-agent systems, and LLMOps. Experienced in developing production-ready AI platforms using LangChain, LangGraph, Azure OpenAI, AWS Bedrock, Google Gemini, MCP, and Langfuse.

Skills

Programming: Python, SQL, Java

Agentic AI & LLMs: LangGraph, MCP, RAG, Multi-Agent Systems, Prompt Engineering, A2A, VectorDB

Cloud & LLMOps: Azure OpenAI, AWS Bedrock, Google Vertex AI, Langfuse, LangSmith

Backend: FastAPI, React, REST APIs, PostgreSQL, OpenSearch, Git

Experience

Deloitte

October 2025 – Present

Analyst | AgenticAI Developer

- Built enterprise multi-agent AI platforms using LangGraph, enabling natural language analytics through agent orchestration, planning, tool calling, routing, and memory across enterprise data.
- Integrated Azure OpenAI, Google Gemini, AWS Bedrock (Claude), and developed reusable AI capabilities using MCP.
- Developed enterprise AI solutions for Data Governance, Metadata Intelligence, Data Lineage, and Data Quality using Agentic AI workflows.
- Leveraged AWS OpenSearch, Amazon S3, and Bedrock to build scalable cloud-native AI applications.

UST Global

July 2024 – October 2025

Developer-I Software Engineering

- Developed enterprise backend applications using Java, Spring Boot, REST APIs, and microservices.
- Built AI-powered legacy code modernization solutions using Azure OpenAI and LangChain, automating AngularJS to Angular 18/React migrations and reducing modernization effort by 40%.
- Developed AI-assisted COBOL to Java/C# migration pipelines to preserve business logic and accelerate enterprise application modernization.

Projects

AgentOps Observability Platform

July 2026 – August 2026

Tools: Langfuse (Self-Hosted), OpenTelemetry, FastAPI, React, ReCharts, Plotly

- Built an enterprise AgentOps platform by extending self-hosted Langfuse with a custom observability dashboard.
- Developed trace visualization for multi-agent workflows with monitoring for prompts, tool calls, latency, token usage, and costs.
- Integrated AI-powered recommendations for prompt optimization, model selection, and cost reduction.

AI Data Governance, Lineage & Quality Platform

Feb 2026 – Jul 2026

Tools: FastAPI, React, LangChain, Azure OpenAI, PostgreSQL, OpenSearch

- Built an AI-powered Data Governance platform for metadata management, stewardship, and governance monitoring.
- Developed LLM-based metadata generation, Data Lineage visualization, and enterprise data cataloging.
- Built an AI-powered Data Quality engine for automatic rule generation, validation, and reporting.
- Implemented PII discovery and governance workflows for secure enterprise data management.

Education

Bachelor of Engineering (B.E.), Information Science and Engineering

2020 - 2024

MVJ College of Engineering, Bengaluru

CGPA: 9.13

Certifications & Achievements

- **Microsoft Certified: Azure AI Engineer Associate** – Microsoft
- **Claude Certified Developer** – Anthropic
- **Model Context Protocol (MCP) Certification** – Anthropic
