Education

Bachelor of Engineering (B.E), Information Science and Engineering 2020 - 2024
MVJ College of Engineering, Bangalore
CGPA: 9.13

Experience

Developer-I Software Engineering Jan 2024 - Present
UST Global

- Worked as part of a GenAI initiative to build LLM-powered enterprise applications for code migration, semantic search, and intelligent automation.
- Integrated LangChain, LangGraph with LLM models to streamline the conversion of legacy systems into modern, scalable codebases.
- Developed vector-based document retrieval systems and RAG pipelines to enhance accuracy of legacy-to-modern code transformation.

Projects

AI-Powered Legacy Code Modernization Jan 2025 - June 2025
TechStack: Azure AI, LangChain, React, Flask

Built AI-assisted systems using GPT models and LangChain to modernize legacy codebases into scalable architectures. Created automated migration tools for AngularJS to Angular 18/React and COBOL to Java/C#, ensuring seamless transformation of components and business logic while maintaining code quality.

Database AI Assistance May 2025 - June 2025
TechStack: LangChain, RAG, OpenAI API, React

Developed an intelligent database assistant leveraging LangChain and RAG for efficient querying and data retrieval. Integrated OpenAI API for natural language processing and built a responsive React frontend for an intuitive AI-driven interface. Implemented vector database techniques for semantic search and optimized LLM performance using prompt engineering.

Pro Innovate – Engineering Inventive Warehouse for Learning Feb 2024 - Jul 2024
TechStack: ReactJS, Spring Boot, Java, MongoDB

Collaborated with a team to develop a web-based platform that empowers engineering students to share ideas and collaborate on interdisciplinary projects. The platform facilitates joint efforts between students from different departments, enabling the integration of both hardware and software components to drive innovation.

Skills

Programming Languages: Java, JavaScript

Technologies: LangChain, RAG, VectorDB, Flask, GenAI, SQL, Microservices, REST APIs, Postman, Git, EC2

Frameworks: React, Spring Boot, Angular

AI/ML: Prompt Engineering, LLM Evaluation, Semantic Search

Certifications & Achievements

- **Microsoft Certified: Azure AI Engineer Associate:** Certified proficiency in implementing AI solutions and Generative AI workflows with Azure Cognitive Services to create and operationalize intelligent applications.
- **Academic Excellence:** Consistently ranked among the top performers in college, demonstrating strong academic dedication and performance.
- **Smart India Hackathon 2024:** Selected to participate in the prestigious national-level innovation competition, showcasing problem-solving skills and innovative thinking.
